very funny.

## Inspirational Reflections on Tyler Perry's House of Payne

June 6th - Premiere Episodes - 9:00pm & 9:30pm EST

### Real Life Solutions For Real Life Situations

Tyler Perry has done it again as he deals with real life situations with real life solutions. I am often amazed at how Tyler Perry has taken his God-given gift and used it to touch and change the lives of so many. In today's world we are facing many challenges that are weakening the moral fiber of our society. Our homes and communities have fallen prey to false pleasures that are destroying the foundation of the family.

There is no easy way to deal with drug addiction especially when it hits home. Tyler Perry blends reality and compassion with a twist of humor that brings joy in the midst of devastation. When a family member is on the brink of destruction as a result of drug abuse, we can be reminded that love, understanding and grace can help us as we face troubled times .

It is evident that Tyler Perry's House of Payne will be a vehicle that connects it's viewers to faith, family and community coupled with a lot of laughter.
